

# MATH TEST CORRECTION SHEET

## INSTRUCTIONS

Use the math test correction sheet to earn back partial credit on questions that you get incorrect. You must return this form *along with the test paper* within two school days of receiving your graded test.

For the “reason I did not receive full credit” section, you should fill in what your error was.

Some examples are:

- I read the question incorrectly
- I made an arithmetic error
- I chose the wrong operation/order of steps when I solved
- I rushed through the question/section/test
- I did not understand the topic
- I did not completely understand the question
- I did not show my work
- I did not answer the question that was asked

When you solve the problem, be sure to show ALL work. You will **not** earn any recovery credit if your work is not shown!

The “what I learned from my mistake” section is just what it sounds like – tell me what you learned! Some examples are:

- I should label my answer
- I need to slow down
- I need to read carefully
- I should highlight important terms
- I should show my work
- I should prepare more thoroughly
